## Awareness and Imagination

The thoughts for this month are going to be a bit of a challenge. It's not easy bringing abstract thoughts from a level lacking both time and space, as we understand it, into a medium which is both time and space. I have deliberately kept the following information, if that is what it can be called, short and without description. This month, the writing is an invitation to recognise your own awareness and the power of your own imagination, to bring a desire into reality. Nothing can be achieved until it has become a reality in your mind, and then only if you see it in the NOW and not as something which might happen in the future.

Reduced to the ridiculous, we are nothing but an awareness with imagination, the one cannot exist without the other. Awareness is 'To Know', it is the 'I AM' in life. Awareness is what allows us to know that we exist and perceive the five senses. Unfortunately, there is more imagination than awareness.

Awareness is 'To Know'. It is the NOW in space. But without imagination, awareness cannot change or grow. Only imagination allows change, it is imagination that creates and causes 'Time'. It is imagination which expands the force of awareness allowing it to change and grow.

\*\*\*\*\*

Awareness is the NOW, our space.  
Imagination is our FUTURE, in that space.  
Awareness gives us what is.  
Imagination gives us what can be.

### **This is the Law of Opportunity**

\*\*\*\*\*

Everything in the Universe is moved through time by electric and magnetic energy.  
They are opposites but created equal.  
There are only two forces, Electric push and Magnetic pull.  
All activity throughout the universe is bound to the principle of push and pull.  
This ensures that what is given is not lost but returns.  
The greater the push (effort), the greater the pull (return).

### **This is the law of Effort and Reward**

\*\*\*\*\*

Electric is positive, Magnetic is negative.  
The Positive relies on giving and expanding.  
The Negative relies on receiving and contracting.  
The positive relies on the FUTURE and change.  
The negative relies on the NOW and is unchanging.

### **This is the Law of Change**

\*\*\*\*\*

There are three attitudes; Creative, Destructive and Passive.  
Positive energy expands and creates.  
Negative energy contracts and destroys.  
Passive energy is unchanging and stagnates.

### **This is the Law of Attitude**

\*\*\*\*\*

Awareness is the power of knowing.  
Imagination is the power of change.  
Every thought has a power to create or destroy.  
Every thought is a prayer to create or destroy.  
Electric power creates from imagination.  
Magnetic power returns the result to awareness.  
Your thoughts can heal or hurt.  
What goes out, expands, to return greater than it was.

### **This is the Law of Karma**

\*\*\*\*\*

Healing has awareness and imagination. It knows what is and what can be.  
Healing is positive, it changes what is to what can be.  
Healing is electric and magnetic, it expands the positive and reduces the negative.  
Healing is creative and destructive.  
Healing creates the future, with imagination and expansion.  
Healing is the now and reduces, with awareness, what is not creative.

### **This is the Law of Healing**

\*\*\*\*\*

There are four energies; Fire, Water, Air and Earth.  
The four are born from the fifth, God (we have no other name for the unknown).

Fire is expansive and heat. From it comes light.	Expanding
Water is contracting and cold. From it comes darkness.	Contracting
Air is balance, active and passive, between fire and water.	Balance
Warmth and moisture, in balance with air, are life.	
Earth is structure and solidification.	Stability

### **This is the Law of Life**

\*\*\*\*\*

If you want to direct *who* you become, you first need to know *who* you have become; to 'think' about *what* you think. The thoughts you are will determine who you become, in this life and the next, in this dimension and the next. You can never be more than an amalgam of the thoughts you are.

Malcolm.
